# JAMES MARNIE N. ARGARIN

Software Engineer ◇ (+63) 9694140079

[jnargarin@gmail.com](mailto:jnargarin@gmail.com) ◇ [LinkedIn](#) ◇ [GitHub](#) ◇ [Portfolio](#)

## SUMMARY

I am an enthusiastic and results-driven Software Engineer with a strong passion for continuous learning and professional growth within the field of software development. I am actively seeking an opportunity to apply my extensive skill set and knowledge to contribute meaningfully to the success of a forward-looking organization.

Throughout my career, I have meticulously honed my technical expertise, encompassing a diverse array of programming languages, frameworks, and cutting-edge technologies. This proficiency enables me to not only meet but consistently exceed project objectives, delivering refined and efficient solutions that align with the highest industry standards. My core stack includes Flutter for mobile development and Next.js (React + Typescript) for web development.

## EDUCATION

**University of the Philippines Los Baños**, Laguna, Philippines                              2019 - 2023
*Bachelor of Science in Computer Science*

- *Cum Laude*
- University Scholar (2020 - 2023)
- DOST-SEI Scholar (2019 - 2023)

## TECHNICAL SKILLS

| | |
|---|---|
| **Programming Languages** | Typescript, JavaScript, Dart |
| **Frameworks and Libraries** | Next.js, React.js, Flutter |
| **Database and ORMs** | MongoDB, MySQL, PostgreSQL, Prisma |
| **Design and Prototyping** | Bubble, Figma, Tailwind CSS |
| **Developer Tools** | Git, Docker, Android Studio, Visual Studio Code |
| **Testing** | Postman |

## PROJECTS

## PROFESSIONAL WORK EXPERIENCE

**Software Engineer**                                                     April 2023 - Present
[GlyphStudios Inc.](#) (Cognitive AI)                                                     *Remote*

- Develop and maintain a CMS website using Next JS, React, and Typescript.
- Manage CI/CD pipeline in Vercel.
- Manages and implements all backend API calls made by the application to databases hosted in AWS and Azure.
- Collaborates with other developers for API development and testing.
- Provides progress report for the development of the application during weekly meetings.

**Junior Software Engineer**                                          September 2022 - April 2023
[GlyphStudios Inc.](#) (Phoenix)                                                     *Remote*

- Implemented sophisticated user interface designs and features with animation using Flutter.
- Automated the cash out process of the application.
- Created staging and production environments for the development of the application leading to reduced time needed for development and testing.

**Quality Engineer Intern**                                           June 2022 - August 2022
[QE 360](#)                                                     *Remote*

- Conducted smoke, functional, and regression testing.
- Developed web and API test scripts for automated testing using Cypress and Robot Framework.
- Ran web and API test scripts for automated testing in Postman.
- Created test charters for Agile Testing using Trello.
- Conducted defect logging and management using Jira.
- Attended scrum meetings to provide updates regarding bug detection and fixes.
